Setting Up Your Website

Last updated February 13th 2019

Step 1:

Go to www.johncrestani.com/bh. Here you'll find your special discount link available to SAS students only.

The image shows a promotional banner for Bluehost. At the top left is the Bluehost logo. To its right is a blue navigation bar with links for 'Hosting', 'WordPress', 'Domains', 'Affiliates', and 'Login'. The main banner features a man with a beard wearing a light pink blazer over a patterned shirt. The text on the banner reads: 'Exclusive Offer for JOHN CRESTANI'. Below this, it lists benefits: 'FREE Domain and Site Builders', 'One-click WordPress Install', '24/7 Support', and '30-Day Money-Back Guarantee'. The pricing is shown as 'Starting at ~~\$7.99~~ \$2.95/month*'. A green button at the bottom left says 'Get Started Now'.

Step 2:

Select your plan. You'll only need the basic plan.

The screenshot shows the Bluehost website's plan selection interface. At the top left is the Bluehost logo. The main heading is "select your plan". Below this are three plan cards: "basic", "plus", and "choice plus" (labeled as "recommended"). Each card displays a price, a "select" button, and a list of features. The "basic" plan is priced at \$2.95/month (normally \$7.99), "plus" at \$5.45/month (normally \$10.99), and "choice plus" at \$5.45/month (normally \$14.99). The "choice plus" plan includes additional extras like SpamExperts, Domain Privacy, and CodeGuard Basic.

Step 3:

Choose your domain name. You'll want to select a name that makes sense to you, either your name or a business name.

E.g. www.joebloggs.com or www.affiliatenewsnow.com

If your name is unavailable, Bluehost will provide a list of alternative suggestions:

The screenshot shows the Bluehost domain registration interface. At the top left is the Bluehost logo. Below it, the text "sign up now" is displayed. A message states: "The domain joebloggs.com is not available for registration". Below this, a prompt says: "Select one of the alternate suggestions below, or try your search using a different domain." A list of suggestions is provided, each with its alternative extensions in parentheses: "joebloggs.site (also: .space .tech .store .club .org .info)", "Myjoebloggs.com (also: .net .online .tech .store .org .info)", "4joebloggs.com (also: .net .online .tech .store .org .info)", "joebloggsGrouponline (also: .site .space .tech .club .biz)", and "Thejoebloggs.com (also: .net .online .site .space .tech .store .club .org .info .biz)". A link "Show fewer suggestions..." is present. Below the suggestions, two more suggestions are listed: "Bejoebloggs.com (also: .online)" and "Injoebloggs.com (also: .online)". A note states: "Domains are not case-sensitive. These domains use capitalization for readability purposes only." At the bottom, there are two main options: "new domain" (with the subtext "Help me get my free domain!") and "i have a domain name" (with the subtext "I want to signup with my existing domain"). The "new domain" option has a text input field containing "joebloggs" and a dropdown menu set to ".com", with a "next" button below. The "i have a domain name" option has an empty text input field and a "next" button below.

If you have an existing domain, you can enter it here.

Step 4:

You'll then be asked to enter your personal details.

Step 8:

Click the 'Login' button to login to your new Bluehost account.

Step 9:

Bluehost has made it super easy to install WordPress and start a blog. Pick a theme! – How you want your site to look. This isn't very important since we are going to actually use Clickfunnels to build all of our pages.

Step 10:

All done! You are now ready to see your WordPress dashboard and begin building your blog. Click “Start Building”

You should now be in your WordPress dashboard! – Let’s activate your blog. Click “Bluehost” on the top left menu.

Step 11:

Click “Launch” – Don’t stress, you will not have millions of people viewing your site.

Congratulations! Now you have your website, and you have wordpress installed. All you need to do now is install the Clickfunnels plugin to connect it to your site.

This is detailed in the PDF tutorial for the Clickfunnels Plugin which can be found in our Support Site.
